Dear FCC,

It has been brought to my attention by XM Radio that our elected officials are proposing a bill to restrict information distribution. I oppose HR 4026 and the fact that the House of Representatives are continuing to waste our tax dollars and confidence on frivolous business issues.

Competition is the capitalistic way of our country it brings us choice and the freedom to make that choice. Plenty of businesses loose by not changing and adapting with the ever-changing evolution of a commercial driven society. For associations of businesses that represent an industry resorts to lobbying to pass laws is a feeble attempt to unfairly stay competitive and a waste of government time and revenue.

I wish to make aware of the elected and paid government officials within the jurisdiction that I vote in to beware. If the Federal and State are not taking care of basic infrastructure, health, education and defense of our nation and taking incentives or voting for bills that have no real need of our well being as U.S. Citizen?s they will not receive a supporting vote from me during election time. Waste, fraud and abuse by public officials will always be prevalent but when this information crosses my table I will answer with one of my tools called voting.

I want to thank XM Radio for bringing this to my attention and remind the FCC to protect information medians and assure fair usage by all.
